Bluetooth Developer Studio Level 1 Profile Report

PROFILE

Profile Name

STUFF MANAGER

Abstract:

The Stuff Manager profile enables the monitoring for some stuff. It's based on a scheme Master-Slave.

Summary:

The Stuff Manager profile defines the interactions for a device who will manage some stuff. There is two roles defined here: Master for the Client and Slave for the Server. The Master will send a command to the Slave and, depends of the mode, will send the list of the stuff or other operations.
